

Data Integration Starter Pack

Installation & Configuration Quick Start

Nearly 65 percent of all installations of IBM InfoSphere DataStage encounter difficulties resulting in delayed projects and development rework and change management problems.

Alpine's Data Integration Starter Pack Installation and Configuration package is a complete solution that seeks to maximize your ETL investment by ensuring that your DataStage environment is stable, secure and compliant with industry best practices.

Step 1: Environment Assessment Analysis

Alpine works with your IT Technical Services and Development teams to:

- Understand the physical environment and security requirements
- Assess the development teams functional requirements
- Develop standard architecture proposal for installation & configuration using best practices
- Provide recommendations for growth strategies as necessary

Step 2: Implementation

Implementation of the IBM InfoSphere DataStage solution

- Install and configure the DataStage software environment per the desired architecture
- Ensure all security requirements have been implemented and the environment is stable & secure
- Validate connectivity into the various data environments for IT development staff
- Provide knowledge transfer to IT Operations to ensure self sufficiency

Step 3: Best Practices and Mentoring

Enablement of key IT development leaders:

- Overview of environment to IT development leaders
- Review of best practices for IT development of DataStage jobs
- Mentor staff through creation or migration of fundamental DataStage jobs

Why A Starter Pack?

Alpine's Data Integration Starter Pack solution is a cost effective vehicle to ensure that your DataStage environment is architected, installed, and configured correctly, thereby minimizing risks and rework. The DataStage Quick Start solution provides clients with peace of mind that the solution has been implemented optimally so they can immediately focus on their data integration initiatives while following best practices to maximize your investment.
